PROFESSIONAL SUMMARY

Full-Stack Engineer with 3+ years of hands-on experience building scalable production systems using Laravel, Next.js, Flutter, and Python AI/ML. Designed and delivered multi-tenant SaaS platforms, property rental marketplaces, and AI-powered medical solutions serving 1,000+ active users. Expert in end-to-end development, from PostgreSQL schema design to Docker CI/CD deployment. Currently open to remote opportunities with EU, US, and GCC companies.

KEY PROJECTS

PRIME-SHOP Multi-Vendor SaaS E-Commerce Platform 2026 (LIVE)
Full-featured multi-vendor marketplace with complete order lifecycle, real-time search, smart cart, wishlist, checkout, and multi-gateway payments (Stripe, PayPal, CIB, Edahabia). Built PDF invoice generation, role-based access (admin, vendor, client), and email notifications via Laravel queues. Technologies: Laravel 11, Inertia.js, React 18, TypeScript, MySQL, Tailwind CSS, Stripe, PayPal, DomPDF

RENTILY Property Rental Platform — Web + Mobile 2026
Airbnb-style rental platform for Algeria featuring headless Laravel API, Next.js frontend, and Flutter mobile app. Implemented multi-role host/guest system, property listings with image uploads, availability calendar, booking approval workflow, and local payment integration. Fully containerized and deployed with CI/CD.

AYADATI Multi-Tenant AI Medical Lab Platform (2023 Graduation Project)
Multi-tenant SaaS for medical laboratories with per-lab data isolation, custom branding, and subdomains. Integrated Python FastAPI microservice for disease prediction (anemia, diabetes) using Scikit-Learn and TensorFlow. Includes appointment booking, test result PDF generation, internal staff chat, and 6-role permission system. Technologies: Laravel 12, Next.js 14, PostgreSQL, Python FastAPI, Scikit-Learn, TensorFlow, Redis, Docker, Stripe
